

MAQUETACIÓN PORTADA PERIÓDICO ONLINE

MARIO JIMÉNEZ MARSET

ÍNDICE

1.	ENUNCIADO - OBJETIVOS	3
	DESARROLLO - CÓDIGO	2

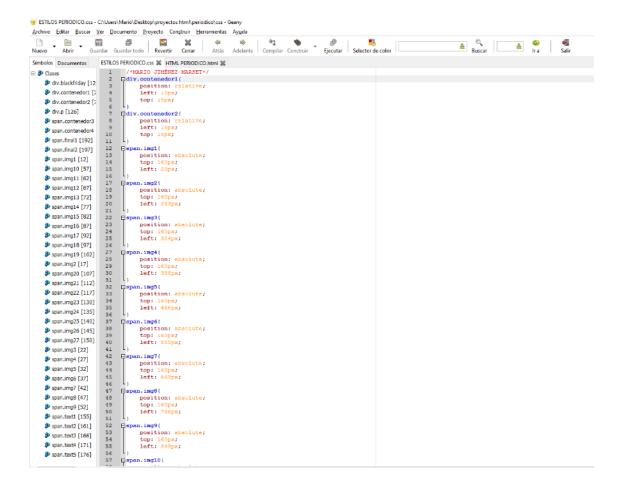

1. ENUNCIADO - OBJETIVOS

En esta práctica de lenguaje de marcas, se pedía crear una página html igual que la dada en el enunciado. Esta debía hacerse a partir de un fichero css externo.

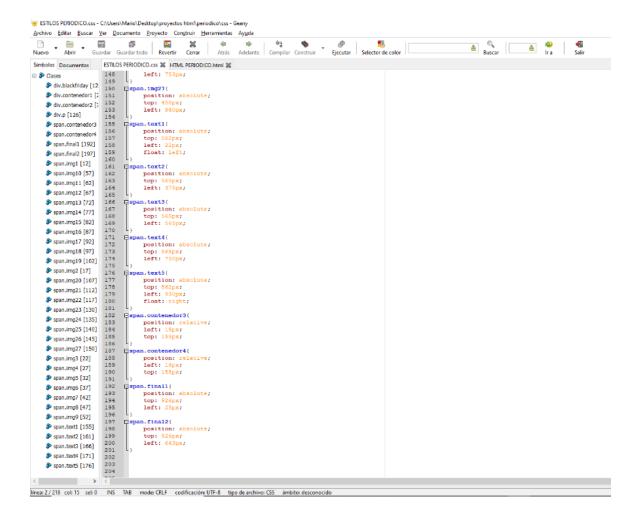

La clave de este ejercicio era utilizar las "Técnicas de Posicionamiento".

2. DESARROLLO - CÓDIGO

En primer lugar, se ha creado un fichero css externo, cuyas características se aplican en el html posterior.

Código del CSS (utilizando técnicas de posicionamiento relative y absolute)

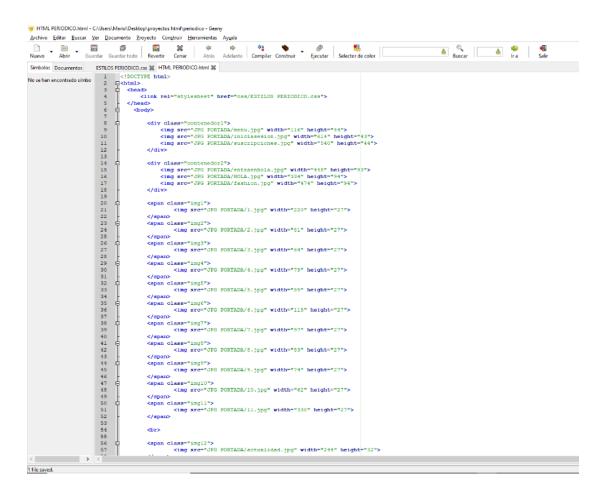

```
/*MARIO JIMÉNEZ MARSET*/
div.contenedor1{
                  position: relative;
                  left: 15px;
                  top: 15px;
div.contenedor2{
                  position: relative;
                  left: 15px;
                  top: 15px;
span.img1{
                  position: absolute;
                  top: 160px;
                  left: 23px;
span.img2{
                  position: absolute;
                  top: 160px;
                  left: 243px;
span.img3{
                  position: absolute;
                  top: 160px;
                  left: 324px;
span.img4{
                  position: absolute;
                  top: 160px;
                  left: 388px;
span.img5{
                  position: absolute;
                  top: 160px;
                  left: 466px;
span.img6{
                  position: absolute;
                  top: 160px;
                  left: 555px;
span.img7{
                  position: absolute;
                  top: 160px;
                  left: 669px;
span.img8{
                  position: absolute;
                  top: 160px;
                  left: 766px;
}
```

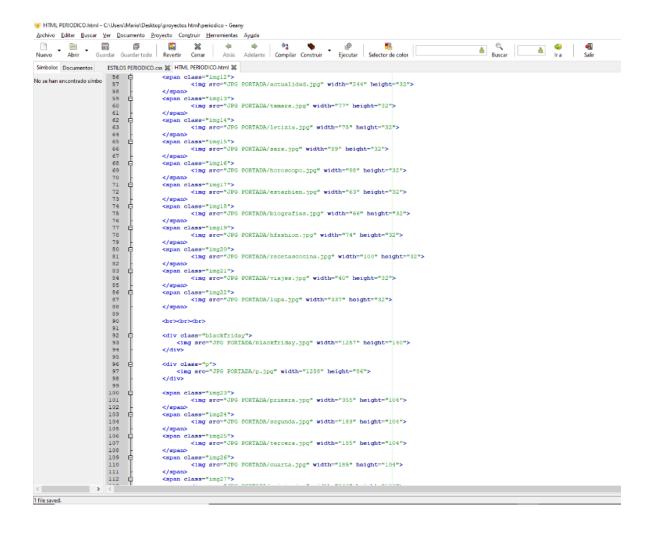

```
span.img9{
                   position: absolute;
                  top: 160px;
                  left: 849px;
span.img10{
                   position: absolute;
                   top: 160px;
                   left: 923px;
span.img11{
                   position: absolute;
                  top: 160px;
                  left: 985px;
span.img12{
                   position: absolute;
                  top: 188px;
                   left: 23px;
span.img13{
                   position: absolute;
                  top: 188px;
                  left: 267px;
span.img14{
                   position: absolute;
                   top: 188px;
                   left: 344px;
span.img15{
                   position: absolute;
                   top: 188px;
                   left: 419px;
span.img16{
                   position: absolute;
                   top: 188px;
                  left: 508px;

                   position: absolute;
                   top: 188px;
                   left: 606px;
span.img18{
                   position: absolute;
                  top: 188px;
                  left: 669px;
span.img19{
                   position: absolute;
                   top: 188px;
                   left: 735px;
}
```

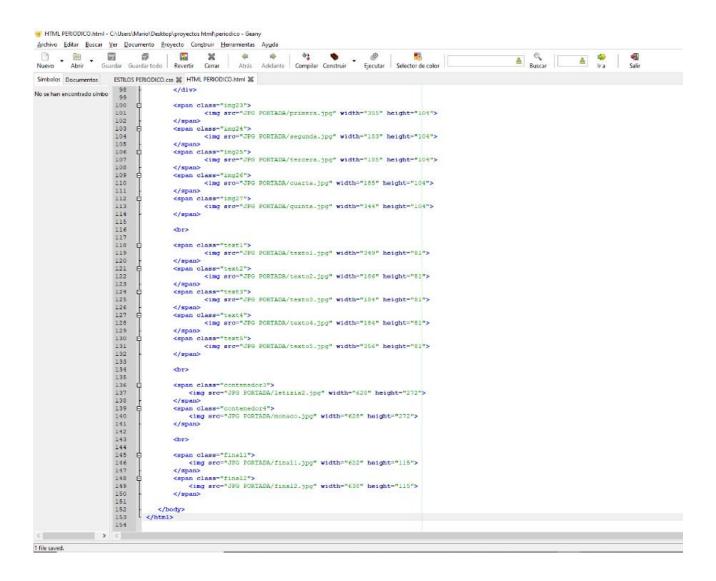

```
span.img20{
                   position: absolute;
                   top: 188px;
                   left: 809px;
span.img21{
                   position: absolute;
                   top: 188px;
                   left: 909px;
span.img22{
                   position: absolute;
                   top: 188px;
                   left: 947px;
div.blackfriday{
                   position: relative;
                   left: 15px;
div.p{
                   position: relative;
                   left: 15px;
span.img23{
                   position: absolute;
                   top: 458px;
                   left: 23px;
span.img24{
                   position: absolute;
                   top: 458px;
                   left: 379px;
span.img25{
                   position: absolute;
                   top: 458px;
                   left: 566px;
span.img26{
                   position: absolute;
                   top: 458px;
                   left: 753px;
span.img27{
                   position: absolute;
                   top: 458px;
                   left: 940px;
span.text1{
                   position: absolute;
                   top: 562px;
                   left: 22px;
                   float: left;
}
```

```
span.text2{
                   position: absolute;
                   top: 565px;
                   left: 375px;
span.text3{
                   position: absolute;
                   top: 565px;
                   left: 565px;
span.text4{
                   position: absolute;
                   top: 565px;
                   left: 750px;
span.text5{
                   position: absolute;
                   top: 562px;
                   left: 930px;
                   float: right;
span.contenedor3{
                   position: relative;
                   left: 15px;
                   top: 155px;
span.contenedor4{
                   position: relative;
                   left: 16px;
                   top: 155px;
span.final1{
                   position: absolute;
                   top: 926px;
                   left: 25px;
span.final2{
                   position: absolute;
                   top: 926px;
                   left: 643px;
}
```

Con esto realizado, se procede a hacer el código html, el cuál mostrará la portada del enunciado.

Código del html (utilizando los separadores nav y div)

```
<!DOCTYPE html>
<html>
 <head>
                 k rel="stylesheet" href="css/ESTILOS PERIODICO.css">
 </head>
                <body>
                      <div class="contenedor1">
                              <img src="JPG PORTADA/menu.jpg" width="116" height="44">

                       </span>
                       <span class="text3">
                                       <img src="JPG PORTADA/texto3.jpg" width="184"</pre>
height="81">
                       </span>
                       <span class="text4">
                                       <img src="JPG PORTADA/texto4.jpg" width="184"</pre>
height="81">
                       </span>
                       <span class="text5">
                                       <img src="JPG PORTADA/texto5.jpg" width="356"</pre>
height="81">
                       </span>
                       <br>
```

```
<span class="contenedor3">
                               <img src="JPG PORTADA/letizia2.jpg" width="628"</pre>
height="272">
                       </span>
                       <span class="contenedor4">
                               <img src="JPG PORTADA/monaco.jpg" width="628"</pre>
height="272">
                       </span>
                       <br>
                       <span class="final1">
                               <img src="JPG PORTADA/final1.jpg" width="622"</pre>
height="115">
                       </span>
                       <span class="final2">
                               <img src="JPG PORTADA/final2.jpg" width="638"</pre>
height="115">
                       </span>
                 </body>
</html>
```

Finalmente, se consigue el resultado final, siendo igual al enunciado pedido.
