T1.7 Codigo ejemplo Process.java

```java
import java.io.File;
import java.io.IOException;
import java.lang.ProcessBuilder.Redirect;

public class Process {

    public static void main(String[] args) {
        // TODO Auto-generated method stub

        ProcessBuilder pb = new ProcessBuilder("java","Suma","4","6");

        pb.directory(new File("/home/administrador/eclipse-workspace/Suma/bin"));

        File f = new File("salida.out");

        pb.redirectErrorStream(true);
        pb.redirectOutput(f);

        try {
            pb.start();
        } catch (IOException e) {
            // TODO Auto-generated catch block
            e.printStackTrace();
        }

    }

}
```

T1.8. Calcular tiempo de ejecución

```java
long startTime = System.nanoTime();

// ...
// El resto del código

long endTime = System.nanoTime();
return (endTime-startTime);
```
